Read/Write/Math Program:

Remedial assistance for children, youth and adults from the general community experiencing reading, writing or math difficulties. Trained, qualified and experienced educational staff assists many clients, in a 1 on 1 setting, to learn strategies which build self-confidence. 75 hour intensive programs are offered as well as booster programs during school breaks.

Learning Centre for Children with Dyslexia

103, 2915 21st Street NE, Calgary

Phone: 403 717-9714

Web: www.srcflcc.org

Email: SRFLCC@gmail.com

The SRCF (Scottish Rite Charitable Foundation) Learning Centre Calgary assists children with Learning Disabilities caused by Dyslexia using the proven Orton-Gillingham method at no charge to the parents. Working in partnership with the school systems, teachers and parents, children attend twice a week for one hour, and meet with a screened and trained tutor in a 1 on 1 setting. The lessons are divided into 5 levels and most children take up to 3 years to complete the program. The two 1 hour sessions per week are all offered after regular school hours, usually from 4 pm to 8 pm, Monday through Thursday.

Sound Connections

Mountain View Academy

B-4 2452 Battleford Ave SW, Calgary

Phone: 403 453-0066

Website: www.soundconnectionscentres.com

Email: soundconnections@telus.net

Sound Connections Programs can be used with all students whether they have identified learning needs or not. A key concept in the Programs is multi-sensory learning, which means that the brain is taught through as many senses and learning styles as is possible. Instructors use toys and attractive resources that appeal to children but also help them to learn. The Programs are fun and many children look forward to the sessions and are continually looking for 'clues' to what is coming next. Students are actively engaged as learners rather than being passive. Sound Connections provides a unique blend of specialist speech-language and literacy expertise. Using original materials, the program has been produced, tried, tested, expanded, and continually refined over many years. The methods suggested are beneficial for all learners and many parts of the Sound Connections Program have been used successfully as whole class activities.
